

Solutions Architect

Location: Hybrid (This role is mainly working from home with the occasional travel onsite or to the office in Corsham)

Salary: £70,000 - £75,000 depending on experience plus an excellent benefits package, plus a Yearly Bonus

Due to the nature of the work, you will be involved in you must hold an SC Clearance minimum and be happy to go through DV Clearance if you don not hold this.

We are seeking skilled Solution Architects on behalf of an IT consulting firm to drive innovative solutions for clients within the defence and public sectors. This role involves integrating with an established architecture team, working on transformative projects that align with client objectives.

You will work directly with UK Government and MoD stakeholders, crafting tailored solutions that meet both present and future business needs. Your focus will be on creating robust, scalable systems while ensuring strategic alignment with long-term client goals.

In this role, you will assess requirements, recommend the best technology options and guide the implementation of selected solutions. Your expertise will ensure that the solutions deliver value and operational efficiency. Collaboration with development teams is key and you will provide practical insights into complex technical challenges.

You will also be proactive in identifying potential risks, cost implications and opportunities to refine strategies. By offering clear guidance, you will help clients adhere to industry standards and quality benchmarks.

Your background in cloud technologies, government security protocols, and Agile/DevOps methodologies will be critical for these projects. You will also bring experience working with diverse teams and navigating various project challenges.
